# *Smart* **SET UP GUIDE**

**Programming your Alula/CloudFan to the  
Tuya Smart App**

Your fan is Smart Ready so there are no extra parts needed and it can be simply paired by following the below instructions.

1

Turn off power to fan at isolation/wall switch and wait for 30 seconds.

2

Turn the power back on, the fan will beep once.

3

Press and hold the “8H” button on your remote control until you hear a repeated beep from the receiver.

If repeated beep is heard, you have now successfully paired your remote and receiver.

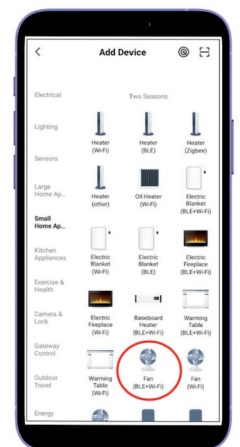

If no repeated beep has been heard, repeat Steps 1-3.

If you are pairing your ceiling fan to a smart device for Tuya control, please follow steps 4 through 9.

4

Open the Tuya App, sign in and select Add Device - Ceiling Fan (BLE+Wi-Fi)

5

Select

Confirm the indicator is blinking slowly.

Continue onto Step

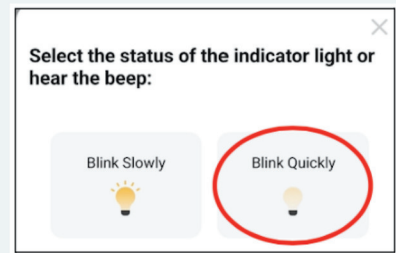

6

6

Select 'Blink Quickly'.

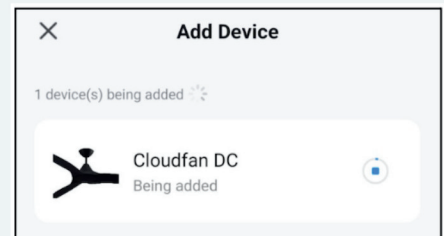

7

Select network (must be 2.4GHz) and enter password, then Next.

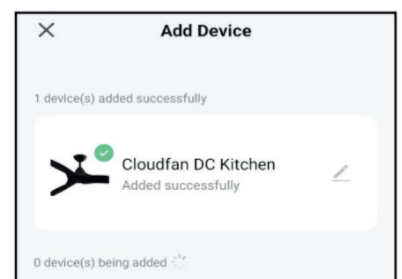

8

You will see the Cloudfan DC being added:

9

Your Cloudfan should now show 'Added successfully' - select DONE.
